PROFESSIONAL SUMMARY

Results-driven **Senior WordPress & Shopify Developer** with 5+ years of experience designing, building, and optimising high-performance e-commerce and corporate websites. Deep expertise in **Core PHP, HTML5, CSS3, JavaScript, and jQuery** with a proven ability to deliver **custom WordPress themes**, fully configured **Shopify stores with Liquid theme development**, **WooCommerce** solutions, and technical SEO strategies for international clients across the USA, Canada, and Saudi Arabia. Adept at website security, hosting management, and working independently to consistently meet tight deadlines.

WORK EXPERIENCE

Senior WordPress & Shopify Developer

SMCSE Solutions PVT LTD, Lahore | November 2023 – Present

- Architected and delivered **20+ custom WordPress websites** from scratch using **Core PHP, HTML5, CSS3, JavaScript, and jQuery**, cutting client revision cycles by 40% through precise specification matching and modular theme architecture.
- Built and launched **5+ Shopify stores** end-to-end — including store configuration, **custom Liquid theme development**, payment gateway integration, and checkout flow optimisation — increasing average client conversion rates by 22% as measured by Shopify Analytics.
- Customised **Shopify themes** using **Liquid, CSS3, and JavaScript** to align with brand requirements, reducing time-to-launch by 30% through reusable in-house component libraries.
- Integrated **WooCommerce** for complex product catalogues, custom pricing rules, and subscription models — delivering fully functional e-commerce solutions tailored to each client's business logic.
- Boosted organic traffic by 25% for three clients, as measured by Google Analytics, by implementing **technical SEO best practices** and on-page performance improvements using **Elementor and Gutenberg** page builders.
- Increased average Google PageSpeed scores by 35% through advanced caching, image optimisation, and **PHP-level code refactoring** across all WordPress and Shopify projects.
- Secured 100% of managed websites against known vulnerabilities, verified through monthly audits, by implementing **security hardening, hosting management, SSL configuration, and automated backup systems**.
- Led project planning across timelines, resources, and deliverables — ensuring on-time delivery for all client engagements while managing parallel WordPress and Shopify workstreams.

Senior WordPress & Shopify Developer — Freelance

Remote — USA, Saudi Arabia, Canada | July 2023 – Present

Key clients: *SIT Digital (Canada) · York Garrison Canada · Neuronics USA · Tree Digital Insurance Agency (Saudi Arabia)*

- Grew client retention rate to 90%, as measured by repeat project contracts, by delivering fully responsive **WooCommerce** stores and **custom PHP WordPress themes** that precisely matched each client's brand and business logic.
- Improved SEO rankings to page 1 for 5+ target keywords per client, as measured by SEMrush tracking reports, by executing complete **technical SEO and SEO strategy** overhauls including schema markup and site architecture restructuring.
- Reduced average website load time by 50%, as measured by GTmetrix scores, by combining **JavaScript/jQuery optimisation, CSS3 minification, and server-side PHP** performance tuning across all client projects.
- Delivered 100% of projects on deadline across three time zones by independently managing **hosting environments, domain configuration, security hardening, and staging workflows** without supervision.
- Diagnosed and resolved complex system faults — including silent WooCommerce checkout failures and PHP memory limit conflicts — using Query Monitor, WP debug logs, and browser-level testing to pinpoint root causes rapidly.

WordPress & Shopify Developer

RF Studio, Islamabad | March 2020 – July 2023

- Designed and maintained **30+ WordPress websites** using **Elementor, WPBakery, HTML5, CSS3, and Core PHP**, reducing bounce rates by 30% through improved UX, faster load times, and mobile-first responsive design.
- Set up and fully configured **8+ Shopify stores** end-to-end — including product catalogue structuring, payment gateway integration, shipping rule setup, and **custom Liquid theme customisation** — delivering every project on schedule and within budget.
- Boosted Shopify store conversion rates by 20% for three clients, as measured by Shopify Analytics, by redesigning checkout flows with **CSS3 and JavaScript** and integrating revenue-aligned upsell apps.
- Implemented **SEO best practices** across all WordPress and Shopify projects — including caching, image compression, and code efficiency — improving average PageSpeed scores by 45% as measured by GTmetrix.
- Extended and customised existing **WordPress themes** to meet project-specific requirements, saving clients an average of PKR 15,000+ per project in licensing costs.
- Cut average bug resolution time by 50%, as measured by internal ticketing logs, by systematically troubleshooting and debugging **PHP, JavaScript, and jQuery** issues in close collaboration with design and content teams.
